NAVITAIRE

An Accenture Company

Case Study

Module Objectives

At the end of this module, you should be able to:

- Explain how this project will be used throughout the course
- Describe the roles and responsibilities of an Application Developer
- Understand case study requirements
- Describe the criteria upon which you will be evaluated

Project Overview

- The application

An console-based application that provides basic functionality for customer information maintenance.

- The application users

Sales Clerk

Roles and Responsibilities

- Code application modules based on specifications
- Debug assigned application modules, if necessary
- Participate in the integration of the application
- Inform supervisor of potential delays in reaching milestones and detail the reasons why

Functional Description (1 of 3)

- The application enables the user to add/view customer demographics. To successfully add customer demographics information, the user should fill out all of the required fields. This form displays the Customer menu to perform the following:
 1. List all customer
 2. Search Customer
 3. Search Customer by Name
 4. Add Customer
 5. Exit

Functional Description (2 of 3)

- If the user selects the first option, the application displays the all customer data that's stored in a text file.
- If the user selects the second option, the application prompts the user to enter the customer id. If customer id exist, the application then displays customer data.
- If the user selects the third option, the application prompts the user to enter customer name. The application then searches customer data stored in a text file. If name is equal to customer's first name or last name, the application then displays customer data.

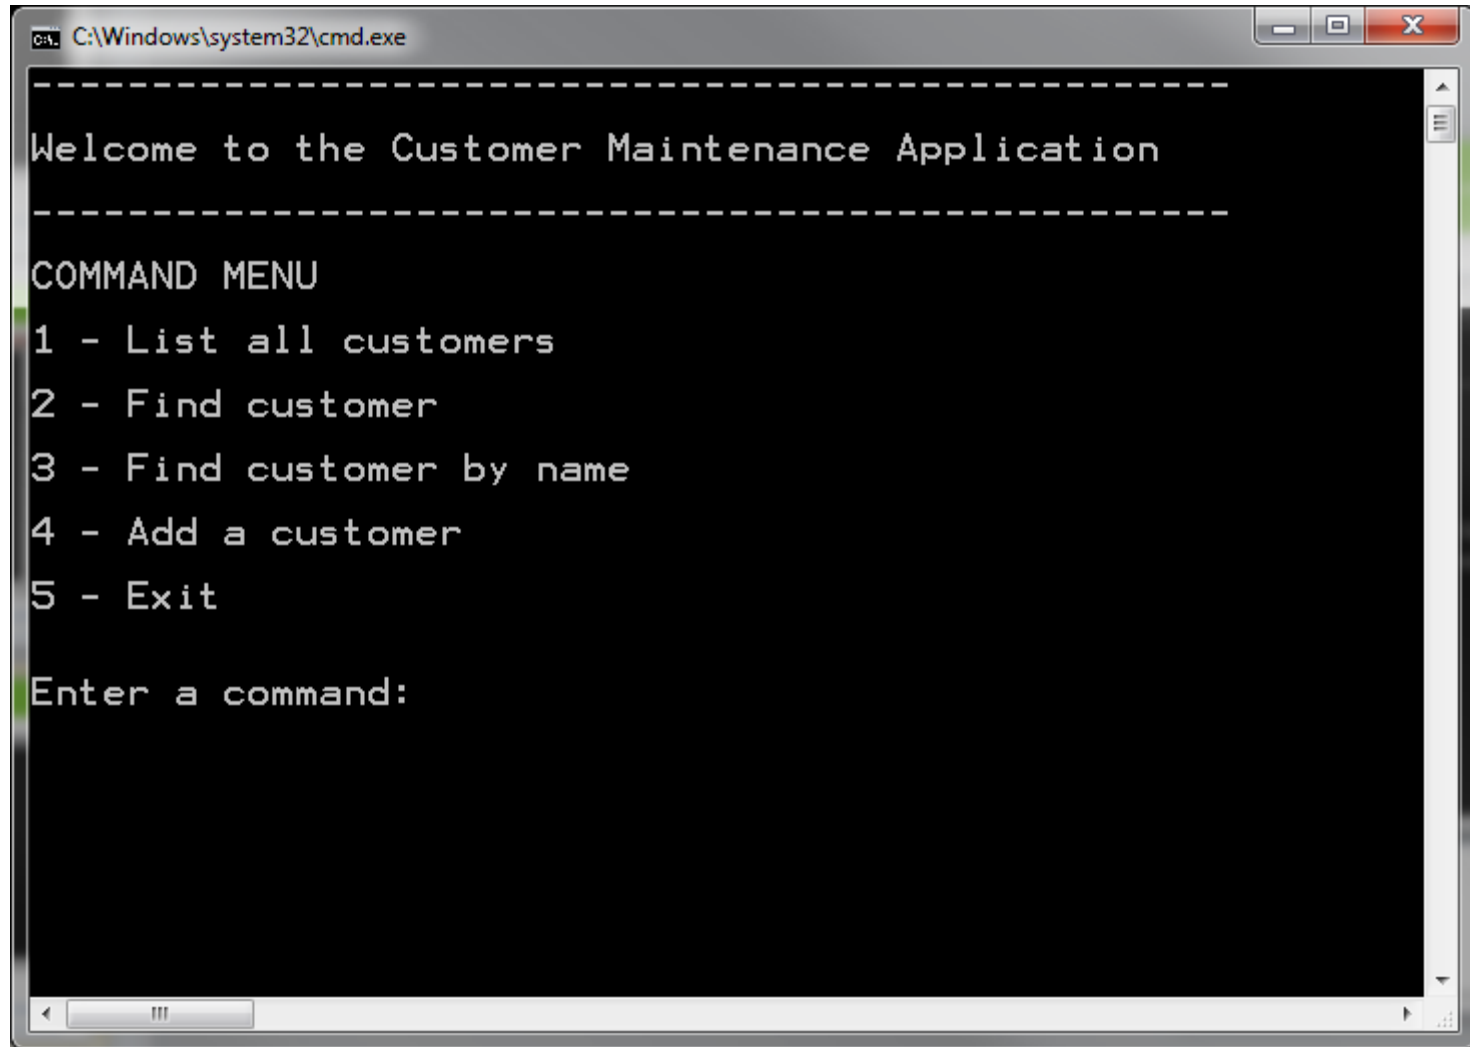

Functional Description (3 of 3)

- If no customer is found when searching by customer id or name, the application displays an error message.
- If the user selects the fourth option, the application then prompt the user to enter customer data and saves that data to the text file.
- The application should validate if the customer id already exists before saving customer data in a text file.
- If the user selects the fifth option, the application displays a goodbye message and exits.

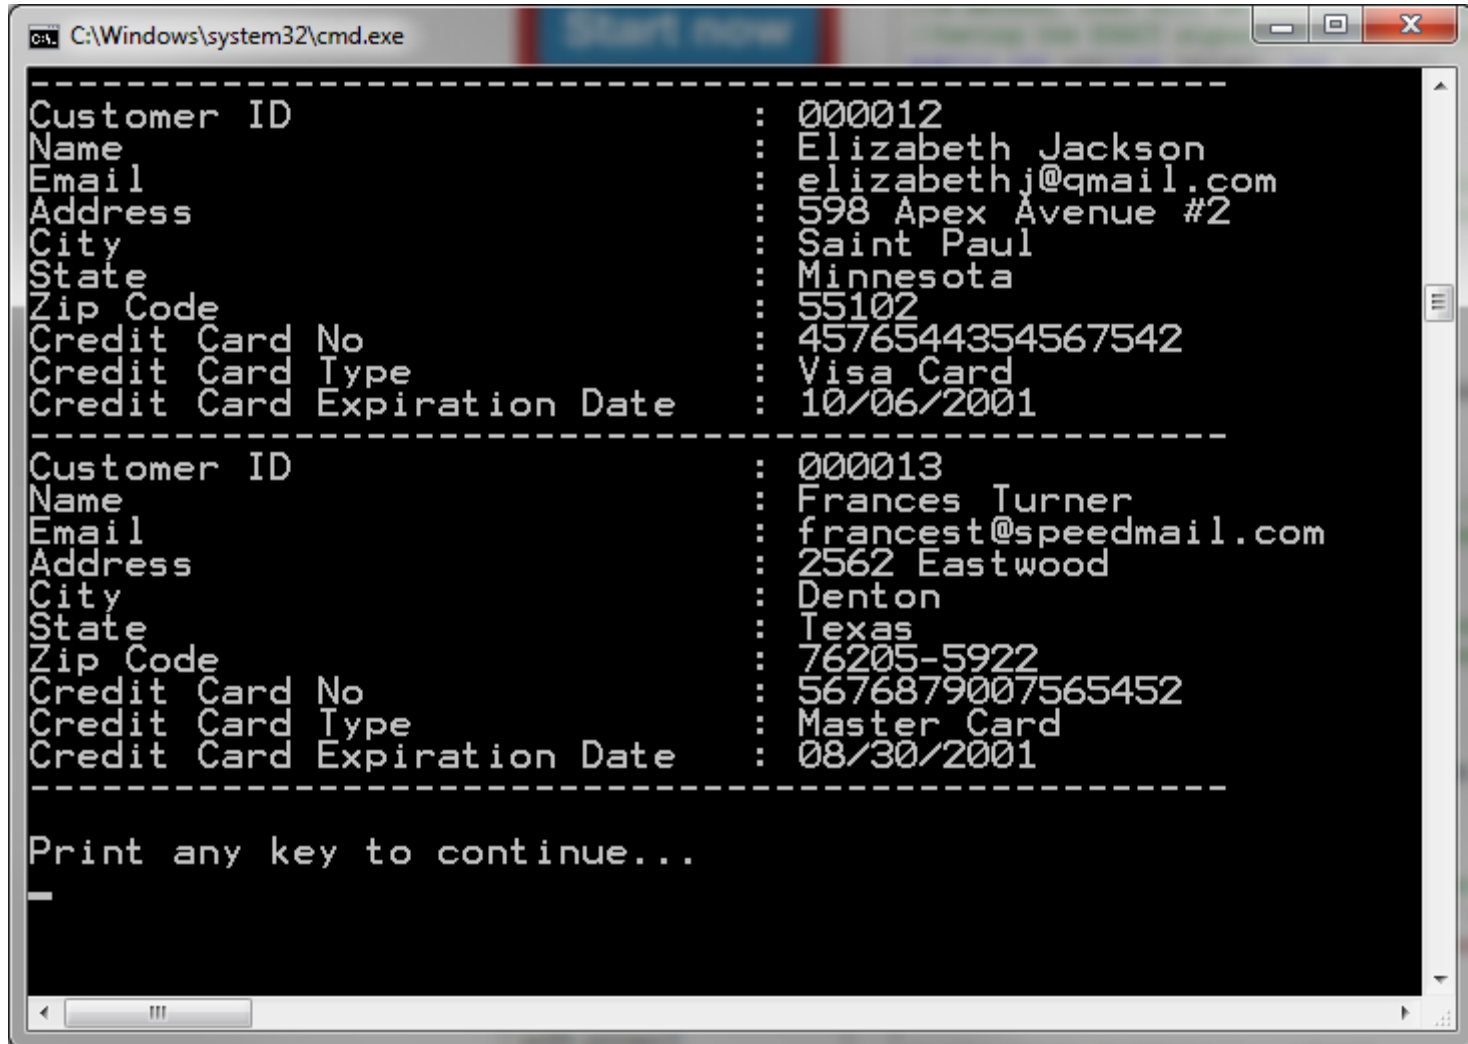

User Interface – Main Screen

A screenshot of a Windows command prompt window titled "C:\Windows\system32\cmd.exe". The window has a black background with white text. The text displayed is as follows:

```
-----  
Welcome to the Customer Maintenance Application  
-----  
  
COMMAND MENU  
1 - List all customers  
2 - Find customer  
3 - Find customer by name  
4 - Add a customer  
5 - Exit  
  
Enter a command:
```

User Interface – List all customers (1 of 2)

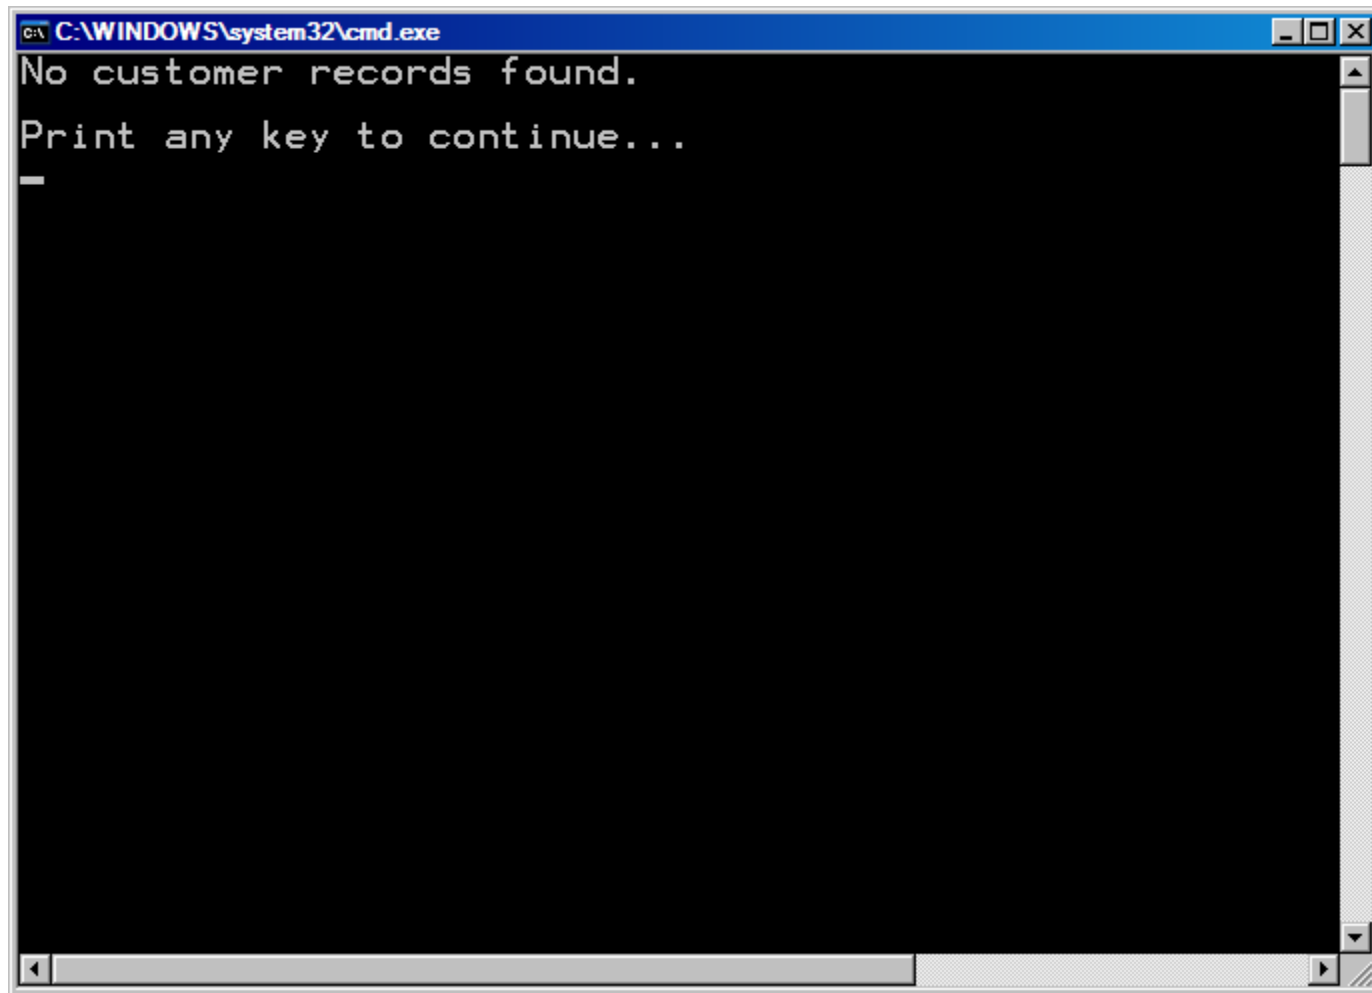

```
C:\Windows\system32\cmd.exe

-----
Customer ID      : 000012
Name             : Elizabeth Jackson

User Interface – List all customers (2 of 2)

```
C:\WINDOWS\system32\cmd.exe
No customer records found.
Print any key to continue...
_
```

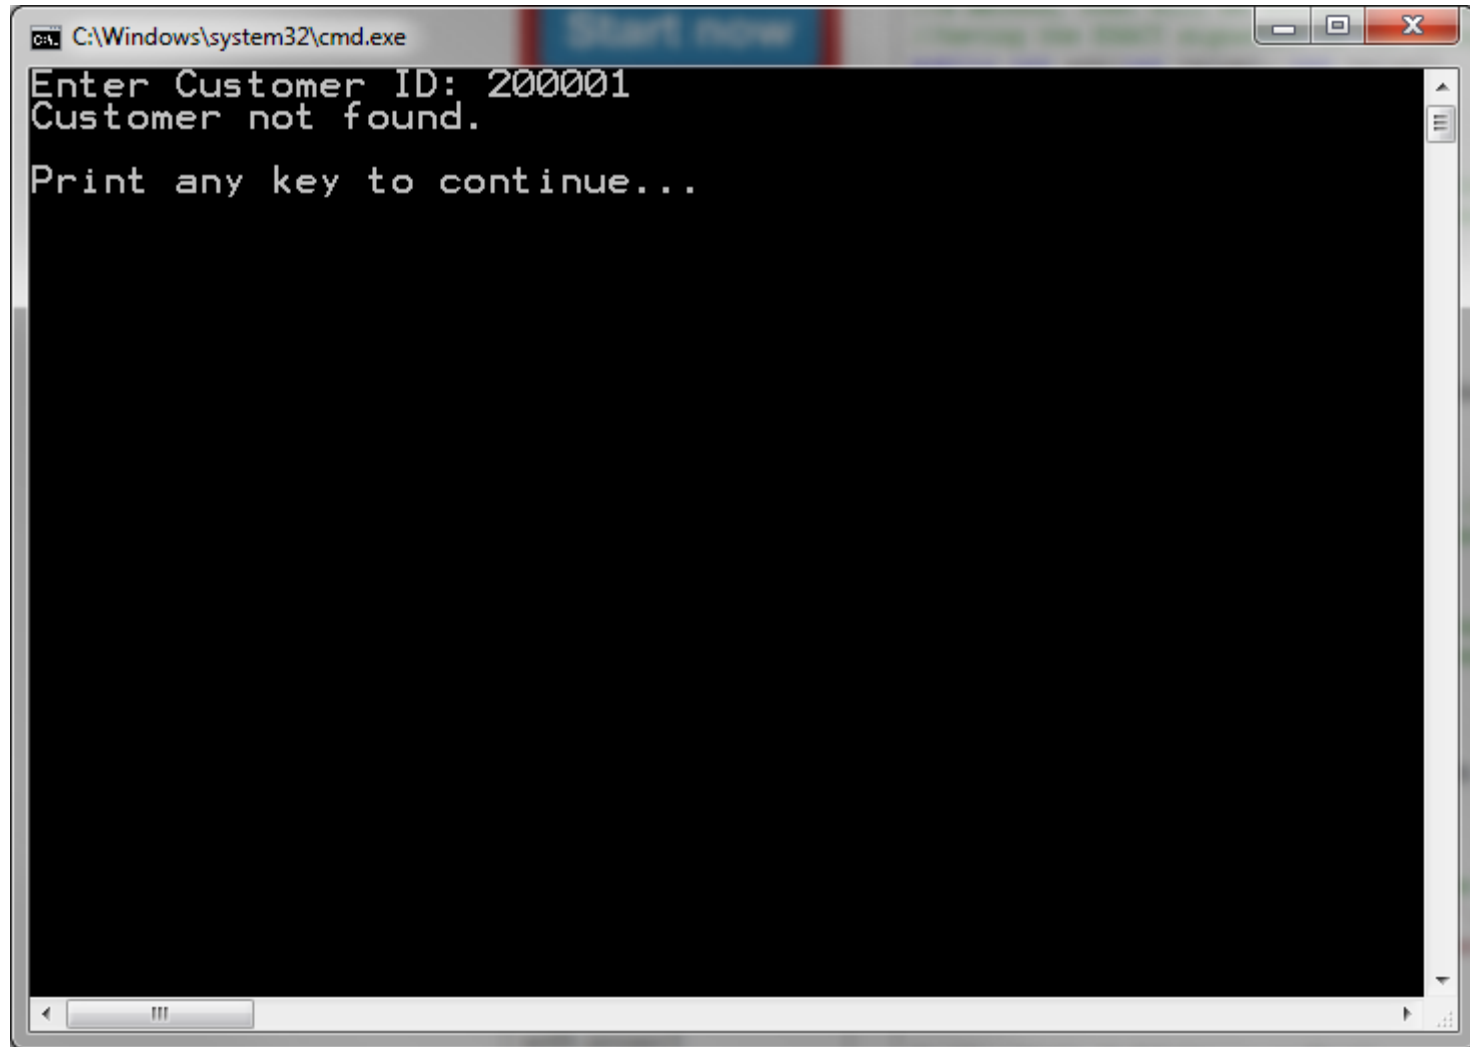

User Interface – Find Customer (1 of 2)

A screenshot of a Windows command prompt window titled "C:\Windows\system32\cmd.exe". The window displays a text-based user interface for finding a customer. It prompts the user to "Enter Customer ID: 000001". Below this, it displays a "Customer Record" for the entered ID. The record is presented as a list of fields and values, separated by colons. The fields include Customer ID, Name, Email, Address, City, State, Zip Code, Credit Card No, Credit Card Type, and Credit Card Expiration Date. The prompt "Print any key to continue..." is shown at the bottom of the record display.

```
C:\Windows\system32\cmd.exe
Enter Customer ID: 000001
-----
Customer Record
-----
Customer ID      : 000001
Name             : Betty Williams
Email            : bettyw@dpeedmil.cm
Address          : 1 Tread Road
City             : Virginia Beach
State            : Varginia
Zip Code         : 23455
Credit Card No   : 4747343412896785
Credit Card Type : Visa Card
Credit Card Expiration Date : 12/12/2001
Print any key to continue...
```

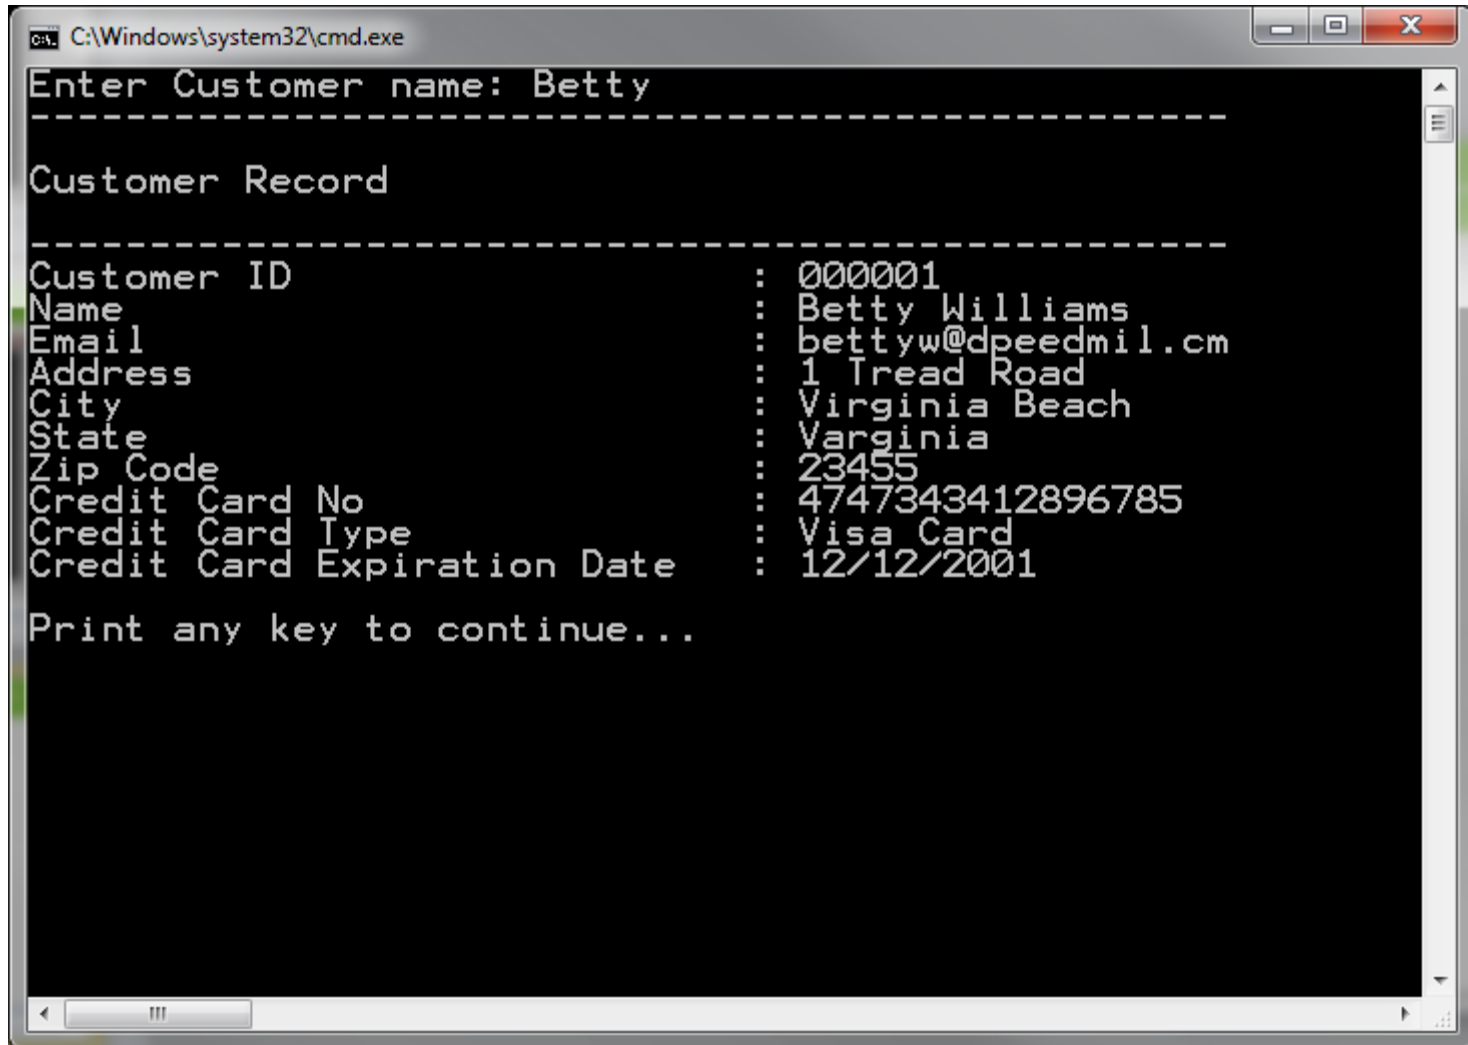

User Interface – Find Customer (2 of 2)

A screenshot of a Windows command prompt window titled "C:\Windows\system32\cmd.exe". The window has a black background with white text. The text displayed is: "Enter Customer ID: 200001", "Customer not found.", and "Print any key to continue...". The window includes standard Windows window controls (minimize, maximize, close) in the top right corner and a scrollbar on the right side.

```
C:\Windows\system32\cmd.exe
Enter Customer ID: 200001
Customer not found.
Print any key to continue...
```

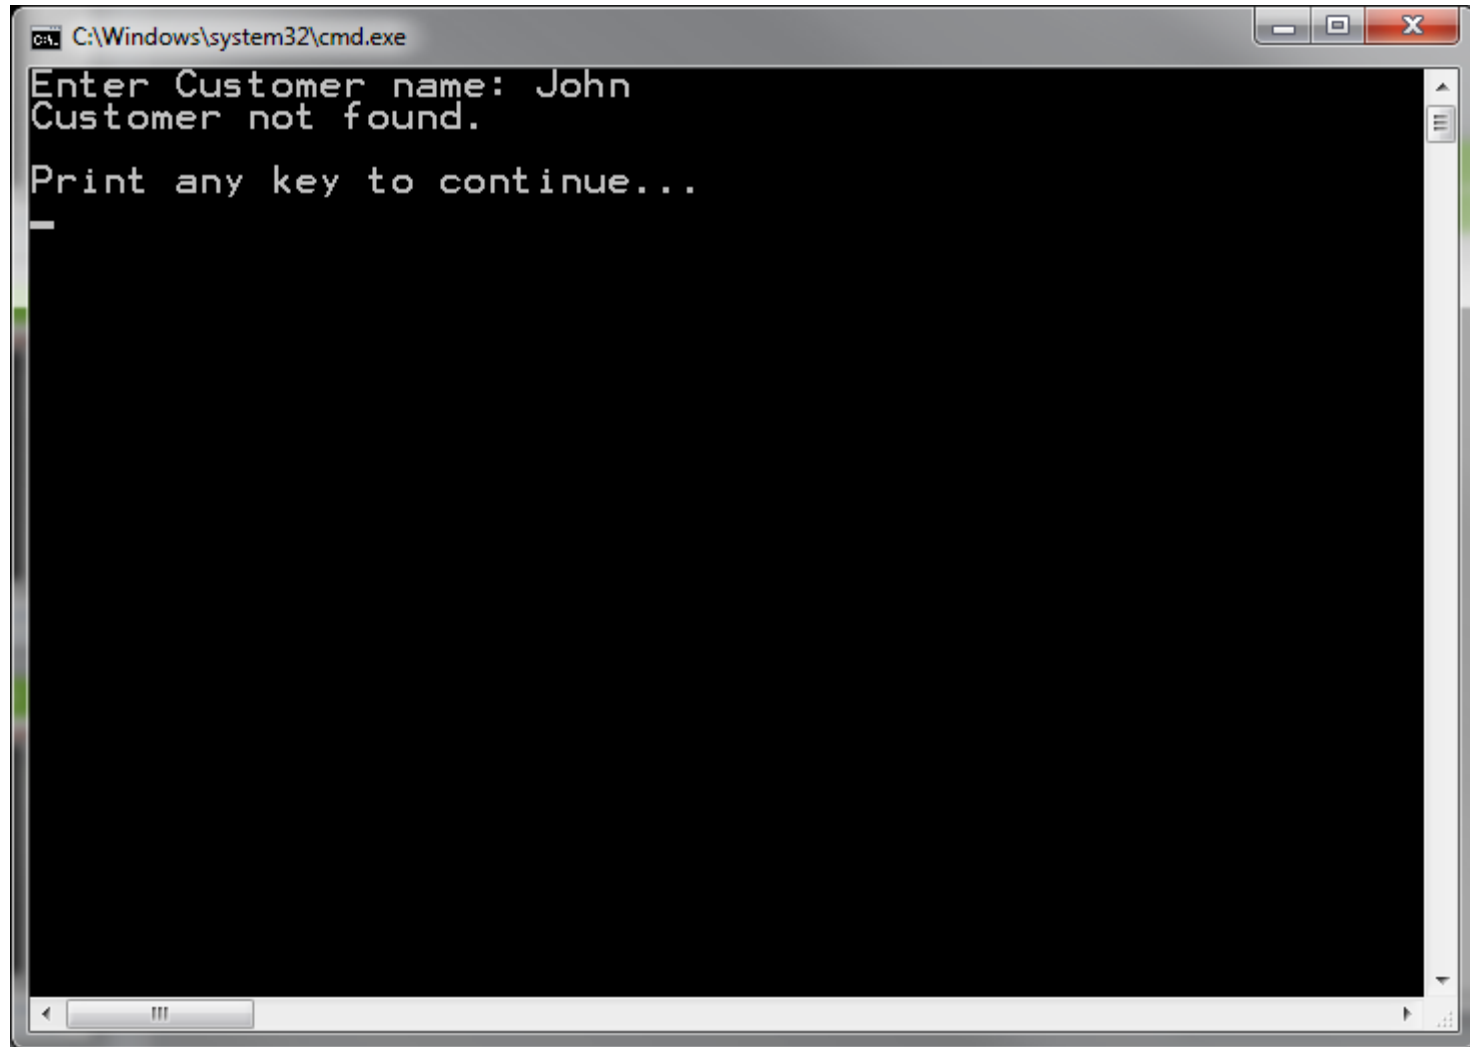

User Interface – Find Customer by name (1 of 2)

A screenshot of a Windows command prompt window titled "C:\Windows\system32\cmd.exe". The window displays a text-based user interface for finding a customer by name. The prompt "Enter Customer name: Betty" is followed by a dashed line separator. Below this, the text "Customer Record" is displayed, followed by another dashed line separator. A list of customer details is shown in a key-value format, separated by a dashed line. The details include Customer ID, Name, Email, Address, City, State, Zip Code, Credit Card No, Credit Card Type, and Credit Card Expiration Date. At the bottom, the prompt "Print any key to continue..." is displayed.

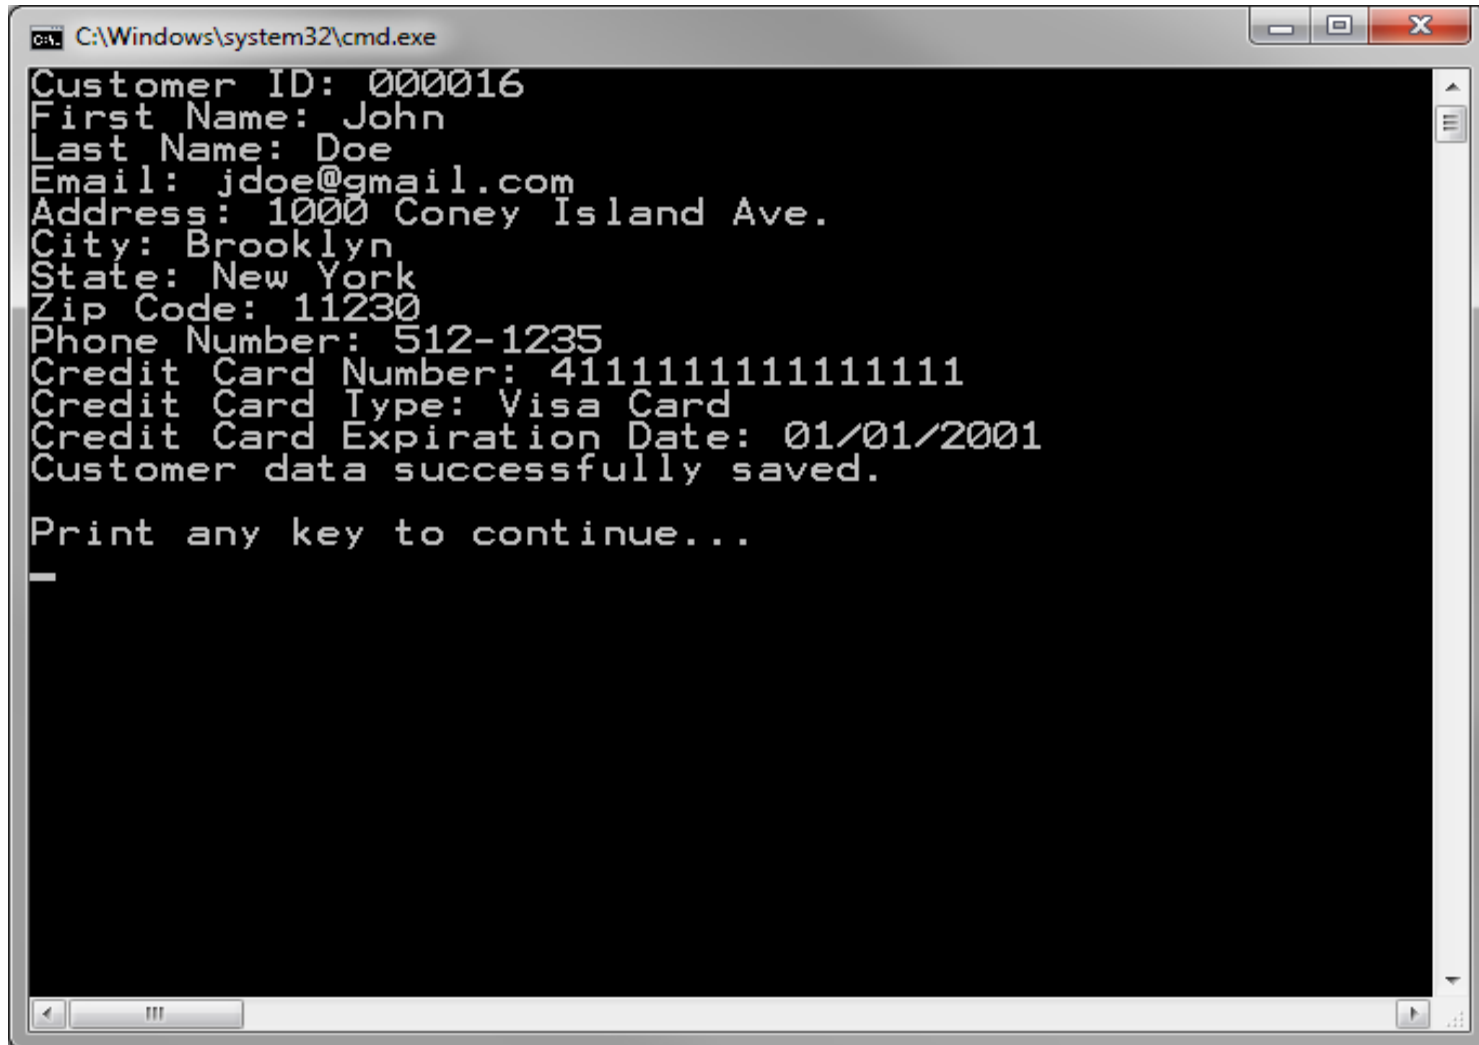

```
C:\Windows\system32\cmd.exe
Enter Customer name: Betty
-----
Customer Record
-----
Customer ID      : 000001
Name             : Betty Williams
Email            : bettyw@dpeedmil.cm
Address          : 1 Tread Road
City             : Virginia Beach
State            : Varginia
Zip Code         : 23455
Credit Card No   : 4747343412896785
Credit Card Type : Visa Card
Credit Card Expiration Date : 12/12/2001
Print any key to continue...
```

User Interface – Find Customer by name (2 of 2)

```
C:\Windows\system32\cmd.exe
Enter Customer name: John
Customer not found.
Print any key to continue...
_
```

User Interface – Add a customer (1 of 5)

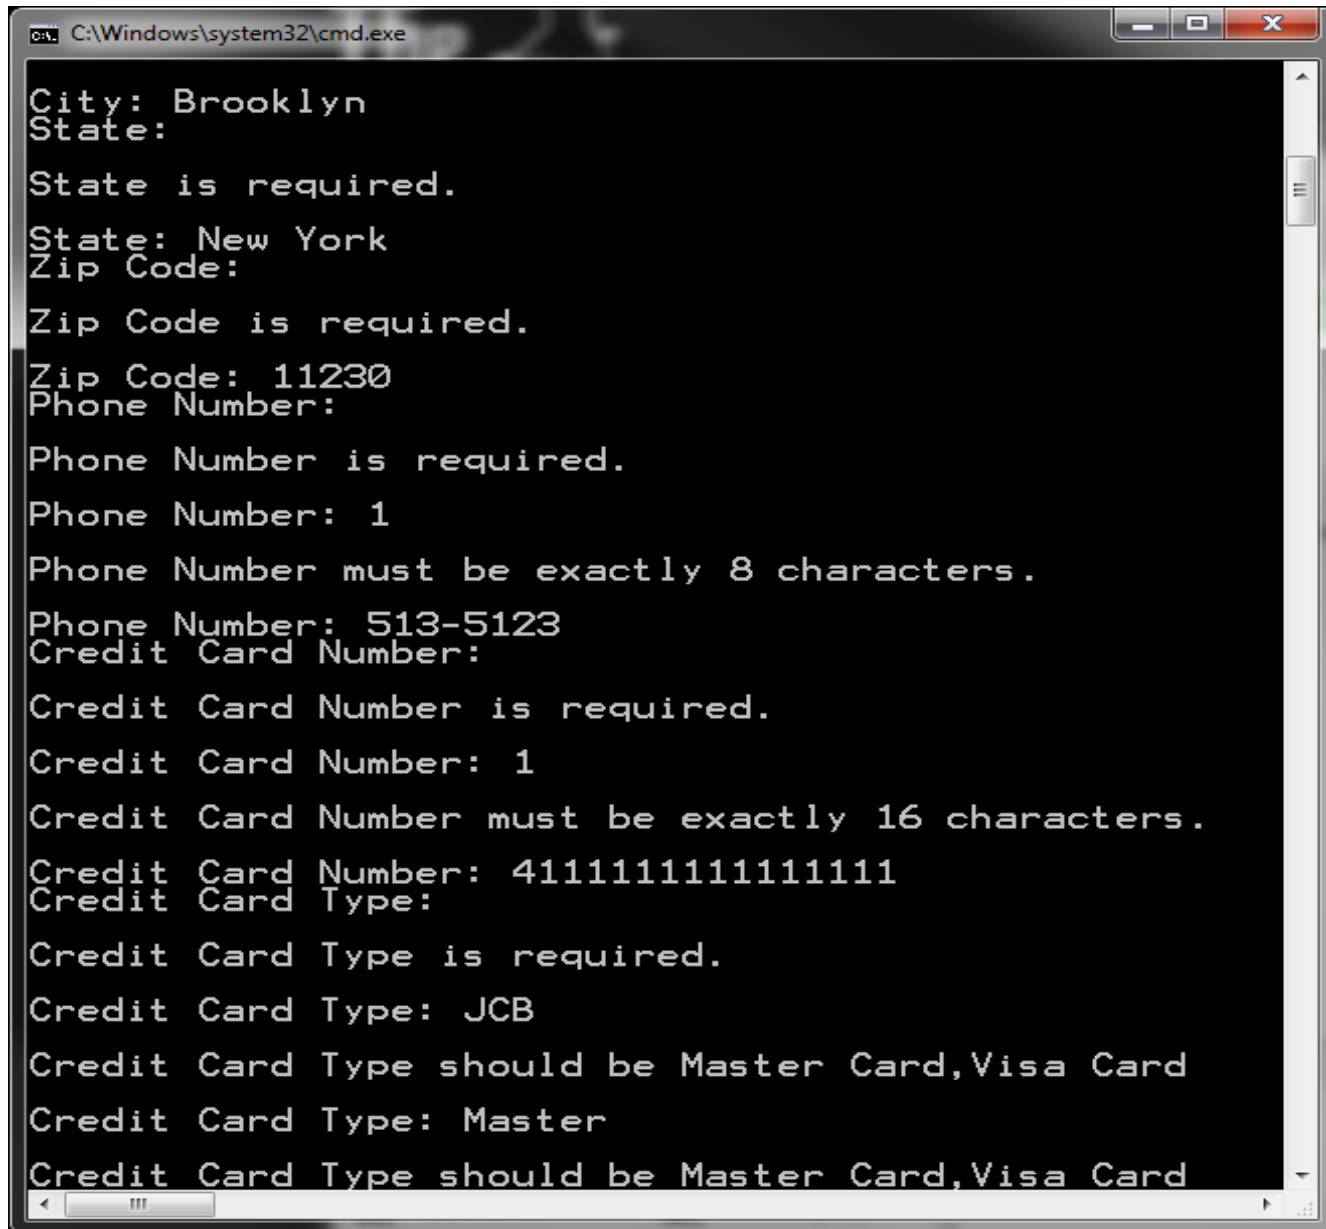

A screenshot of a Windows command prompt window titled "C:\Windows\system32\cmd.exe". The window has a black background with white text. The text displays the following information: Customer ID: 000016, First Name: John, Last Name: Doe, Email: jdoe@gmail.com, Address: 1000 Coney Island Ave., City: Brooklyn, State: New York, Zip Code: 11230, Phone Number: 512-1235, Credit Card Number: 4111111111111111, Credit Card Type: Visa Card, Credit Card Expiration Date: 01/01/2001. Below this, it says "Customer data successfully saved." and "Print any key to continue...". A single underscore character is visible on the line following the prompt.

```
C:\Windows\system32\cmd.exe
Customer ID: 000016
First Name: John
Last Name: Doe
Email: jdoe@gmail.com
Address: 1000 Coney Island Ave.
City: Brooklyn
State: New York
Zip Code: 11230
Phone Number: 512-1235
Credit Card Number: 4111111111111111
Credit Card Type: Visa Card
Credit Card Expiration Date: 01/01/2001
Customer data successfully saved.
Print any key to continue...
_
```

User Interface – Add a customer (2 of 5)

```
C:\Windows\system32\cmd.exe
Customer ID:
Customer ID is required.
Customer ID: 001
Customer ID must be exactly 6 characters.
Customer ID: 000001
First Name:
First Name is required.
First Name: John
Last Name:
Last Name is required.
Last Name: Doe
Email: a@
Invalid email.
Email: jdoe@yahoo
Invalid email.
Email: jdoe@yahoo.com
Address:
Address is required.
Address: 1000 Coney Island Ave.
City:
City is required.
City: Brooklyn
```

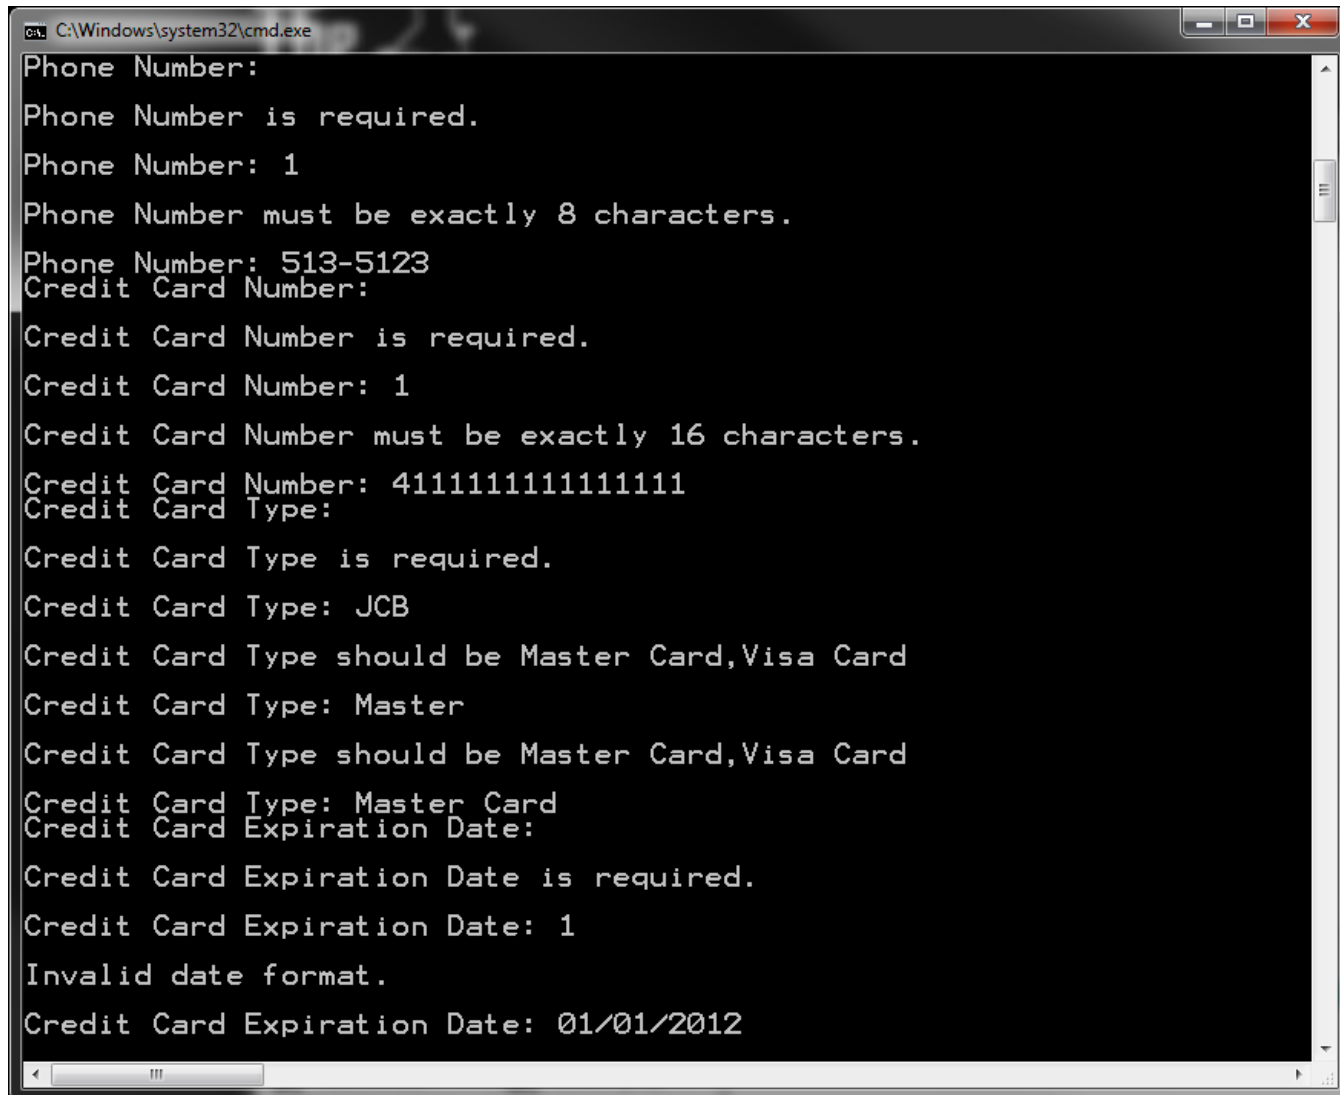

Option 4 – Add a customer (3 of 5)

```
C:\Windows\system32\cmd.exe

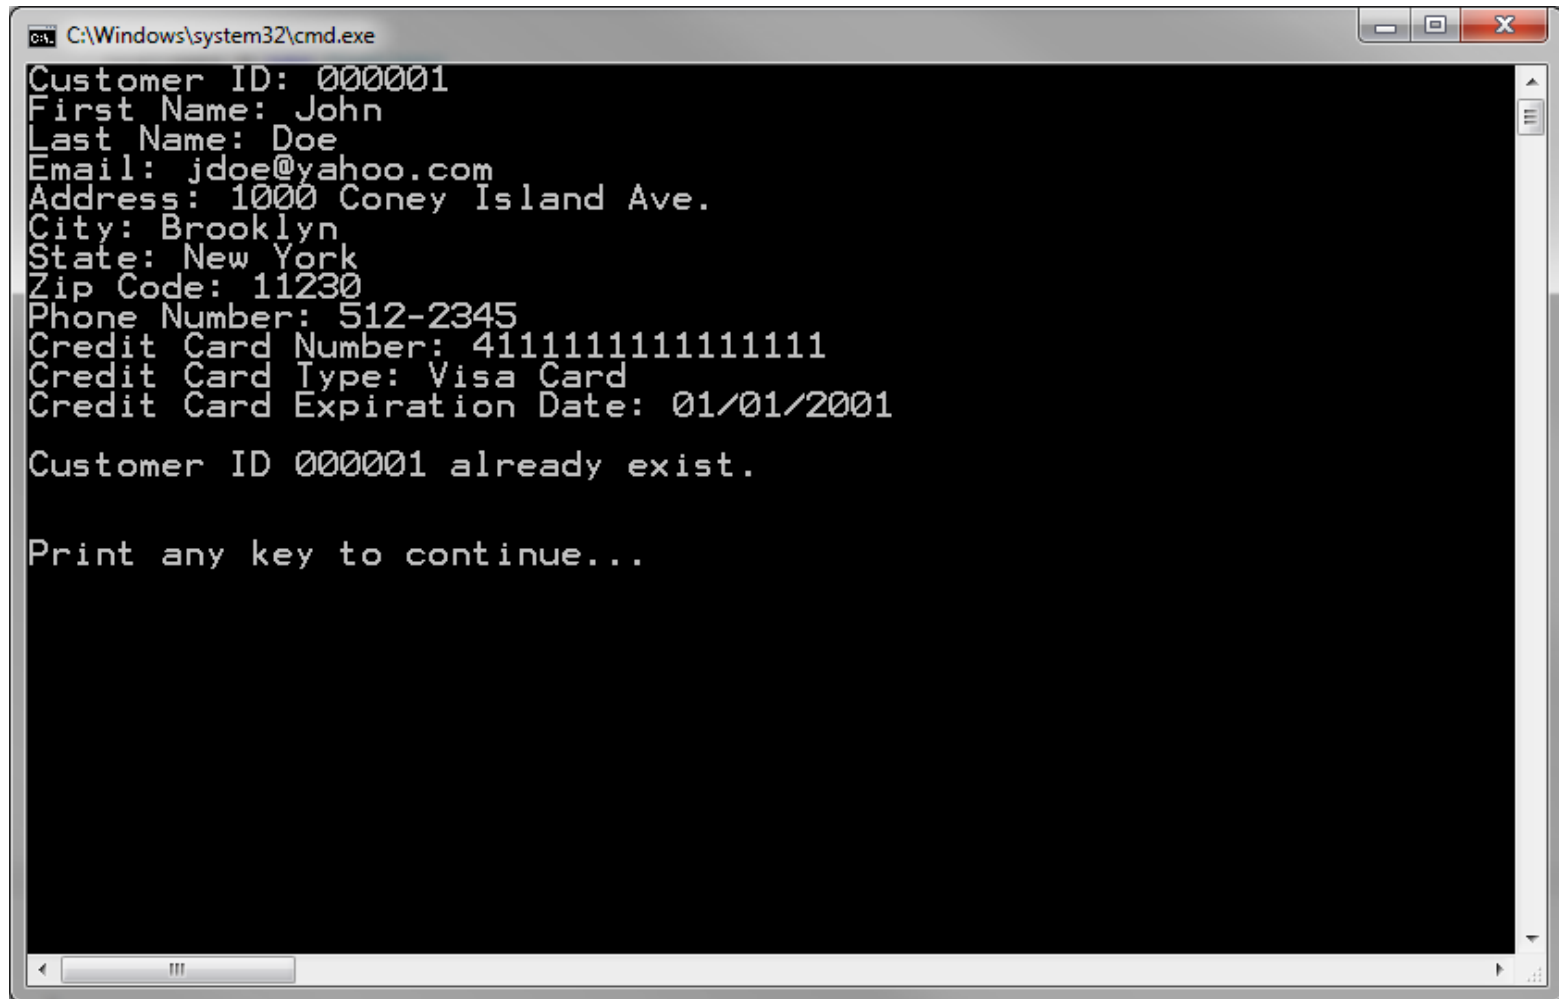

City: Brooklyn
State:
State is required.
State: New York
Zip Code:
Zip Code is required.
Zip Code: 11230
Phone Number:
Phone Number is required.
Phone Number: 1
Phone Number must be exactly 8 characters.
Phone Number: 513-5123
Credit Card Number:
Credit Card Number is required.
Credit Card Number: 1
Credit Card Number must be exactly 16 characters.
Credit Card Number: 4111111111111111
Credit Card Type:
Credit Card Type is required.
Credit Card Type: JCB
Credit Card Type should be Master Card, Visa Card
Credit Card Type: Master
Credit Card Type should be Master Card, Visa Card
```

User Interface – Add a customer (4 of 5)

```
C:\Windows\system32\cmd.exe
Phone Number:
Phone Number is required.
Phone Number: 1
Phone Number must be exactly 8 characters.
Phone Number: 513-5123
Credit Card Number:
Credit Card Number is required.
Credit Card Number: 1
Credit Card Number must be exactly 16 characters.
Credit Card Number: 4111111111111111
Credit Card Type:
Credit Card Type is required.
Credit Card Type: JCB
Credit Card Type should be Master Card, Visa Card
Credit Card Type: Master
Credit Card Type should be Master Card, Visa Card
Credit Card Type: Master Card
Credit Card Expiration Date:
Credit Card Expiration Date is required.
Credit Card Expiration Date: 1
Invalid date format.
Credit Card Expiration Date: 01/01/2012
```

User Interface – Add a customer (5 of 5)

A screenshot of a Windows command prompt window titled "C:\Windows\system32\cmd.exe". The window has a black background with white text. The text displays a series of customer details: Customer ID: 000001, First Name: John, Last Name: Doe, Email: jdoe@yahoo.com, Address: 1000 Coney Island Ave., City: Brooklyn, State: New York, Zip Code: 11230, Phone Number: 512-2345, Credit Card Number: 4111111111111111, Credit Card Type: Visa Card, and Credit Card Expiration Date: 01/01/2001. Below these details, a message states "Customer ID 000001 already exist." followed by "Print any key to continue...". The window includes standard Windows window controls (minimize, maximize, close) in the top right corner and a scrollbar on the right side.

```
C:\Windows\system32\cmd.exe
Customer ID: 000001
First Name: John
Last Name: Doe
Email: jdoe@yahoo.com
Address: 1000 Coney Island Ave.
City: Brooklyn
State: New York
Zip Code: 11230
Phone Number: 512-2345
Credit Card Number: 4111111111111111
Credit Card Type: Visa Card
Credit Card Expiration Date: 01/01/2001

Customer ID 000001 already exist.

Print any key to continue...
```

User Interface – Add Customer Elements

Element Name	Element Type	Data Type	Max Length	Mandatory	Input validation
Customer ID	Text Field	String	6	Yes	A
First Name	Text Field	String	20	Yes	C
Last Name	Text Field	String	20	Yes	C
Email	Text Field	String	50	Yes	NA
Address	Text Field	String	100	Yes	C
City	Text Filed	String	30	Yes	D
State	Text Field	String	30	Yes	D
Zip Code	Text Field	String	5	Yes	C
Phone Number	Text Field	String	8	Yes	C
Credit Card Number	Test Field	String	16	Yes	A
Credit Card Type	Text Field	String	11	Yes	F
Credit Card Expiration Date	Text Field	Date	8	Yes	E

Input Validation Criteria

- A. Numbers only**
- B. Numbers, spaces (), and dashes (-) only**
- C. Letters, numbers, underscores (_), dashes (-), spaces (), and dots (.) only**
- D. Letters and numbers only**
- E. The date format is "MM-DD-YYYY"**
- F. Specific inputs to be entered are Master Card and Visa Card**

Customer Data File

- Store the customer data in a text file named customers.txt in a comma delimited format.
Field1, Field2, Field3, Field4, Field5, Field6, Field7, Field8, Field9, Field10, Field11, Field12
- The application will maintain one line per customer record in the data file.
- If the customers.txt file doesn't exist, this application should create it.

Field 1 – Customer Id

Field 2 – First Name

Field 3 – Last Name

Field 4 – Email

Field 5 – Address

Field 6 – City

Field 7 – State

Field 8 – Zip Code

Field 9 – Phone Number

Field 10 – Credit Card Number

Field 11 – Credit Card Type

Field 12 – Credit Card Expiration Date

Case Study Evaluation Parameters

■ Application Design & Architecture

- Supports the technical design process by participating in the analysis of technical application requirements
- Participates in the program/module detailed design

■ Application Programming

- Codes modules following the design specifications and standards
- Participates in the code review
- Creates documentation for the code/application

■ Operational Effectiveness

- Utilizes standard methods and tools to improve personal productivity
- Organizes own work, building time for review in order to minimize errors and avoid rework
- Studies a problem but does not spend excessive time on it before asking their supervisor for help
- Identifies possible causes of an issue and contributes to developing a resolution

Case Study Evaluation Parameters

■ People Development

- Works with team to manage own workload for reasonable work/life balance
- Seeks and responds to developmental feedback
- Takes advantage of job opportunities to learn new applications, technologies, skills (hands on)

■ Professional Qualities and Communication

- Asks questions to clarify objectives and priorities of tasks and activities
- Listens to and accurately captures expectations, ideas, and concerns of others
- Is clear and concise in written and verbal communications, using appropriate level of detail
- Keeps commitments and promises
- Contributes to a motivated and productive working atmosphere
- Uses time intelligently
- Remains calm when under pressure

■ Value Creation

- Maintains focus on assigned tasks despite distractions

Summary

- Explain how this project will be used throughout the course
- Describe the roles and responsibilities of an Application Developer
- Understand case study requirements
- Describe the criteria upon which you will be evaluated
